DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 2. Claims 19 –48 are rejected under 35 U.S.C. 103(a) as being unpatentable over Funari (US4171477).

Funari discloses a soldering iron tip with first and second electrodes (10, 11) wherein the heating device has a high resistivity and is made of a material including graphite (column 7, line 57-column 8, line 12), the electrical power includes a battery source (column 5, lines 58-61). Although Funari does not specifically disclose a flexural strength of 1500 psi, a density of 1-5-1.75 g/cc, a thermal conductivity of less than or equal to 10 BTU/hr-ft-degree Fand an electrical resistivity of 1500 micro-ohm-cm/over 3000 micro-ohm-cm, these characterisitics would be obivious since Funari does disclose a heater made of graphite which is the same material that Applicant's heater is made of.

Conclusion

3. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Shawntina T. Fuqua whose telephone number is (571) 272-4779. The examiner can normally be reached on Monday-Friday 8-4:30 pm.

Art Unit: 3742

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robin Evans can be reached on (571) 272-4777. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
